

Mentorship Program

Candidates who have had their credentials accepted by ABPP/ABCN to proceed with the examination process have the opportunity to request a mentor to help them prepare for the various steps. Mentors are board-certified (ABCN) neuropsychologists who have agreed to donate a limited proportion of their time to assist candidates in preparing for the written examination, select cases for work samples, and conduct mock oral exams. Although not required in order to sit for any of the components of the board certification process, the assistance of a mentor can be of considerable help to candidates. For more information contact Jacobus Donders (jacobus.donders@maryfreebed.com).
